

FABRENE®

A Magnera Brand

PROTECTIVE FABRIC SOLUTIONS

• • • • • • • •
• • • • • • • •

Located in North Bay, Ontario, Fabrene specializes in producing wide-width coated polyolefin products with extensive manufacturing capabilities in extrusion, weaving, coating, multi-layer laminating, and flexographic printing. We distribute globally across multiple industrial end-use segments, emphasizing our commitment to safety, quality, and customer service and highlighting our values of integrity, trust, and accountability.

PROTECTIVE FABRIC SOLUTIONS

As a distinguished industry leader and entrusted global supplier, Fabrene® boasts a broad selection of high quality coated woven and nonwoven polyolefin-based fabrics for users in a variety of select markets. We consistently use our production expertise and wide range of manufacturing platforms to craft high-quality products for a range of markets, including building and construction, geo-membrane, print media, and industrial packaging.
